

B Anything™

Bar Coding and Electronic Ordering/Receiving system

Flexible, Secure, Scalable, Integrated

Flexible

- 1) Support multiple handheld environments – Windows CE, Blackberry, Windows XP
- 2) Supports Different Manufacturers – Intermec, Motorola etc.
- 3) Support Multiple Communication Protocols(depends on hardware)– Wi-fi 802.11x support, WiMax, GPRS support
- 4) Support Multi-language
- 5) Internationalisation support – can support multiple time zones in multiple locations
- 6) Server can run on multiple Operating systems due to J2EE architecture.

Secure

- 1) Secure SignOn
- 2) SSL support is supported for most standard SSL certificate providers like Verisign.
- 3) Supports Ability to login to proprietary networks as a precursor to logging into the hub (central server)
- 4) Ability to support most custom network security requirements

B Anything™

Bar Coding and Electronic Ordering/Receiving system

Scalable

- 1) Supports EDI(Electronic Data Interchange) Ordering and ASN(Advanced Shipment Notification) systems
- 2) Easy to implement at multiple locations due to hub and spoke design and architecture.
- 3) Flexible Workflow Process – can support multiple workflows at multiple locations – e.g warehouse 1 has a process different from warehouse 2. B Anything can support both warehouse processes without any changes to the code.

Integrated

- 1) Supports queries into proprietary applications as part of the workflow.
- 2) Application supported out of the box are
 - a. Sage ACCPAC ERP
 - b. Radio Beacon WMS
 - c. Manhattan Associates WMS
 - d. SAP
 - e. JBA (AS400) ERP
 - f. Microsoft Dynamics
- 3) Integration and Services Group can build Integrations into most other applications.
